Wood to be got along the road same day

Next encampment should be on Encampment Cr: to avoid too long march next day

Wood to certainty or brought from Encampment Cr:

This camp can be avoided by stopping at Holt Cr: Wood should also be brought from Encampment Cr: shortens journey next day

Should enemy in high or possible up Tucumcari Cr to

Note The Figures from 43 to 57 denote the several encampments. The water becoming more scarce, its location, where it appeared in sufficient quantity, is indicated in writing. The grass, an alternation and sometimes a commixture of Buffalo and Prairie, with an occasional patch of Mesquite begins to become rather scant after reaching Shade Creek. But it is believed that generally, if not always, an ample supply may be had by a slight search to the right or left of the road, particularly on the streams. Wood, sometimes abundant, generally sufficient and always so distributed that it can be had with little trouble.
